

One-Day Course in Honolulu, Hawaii • January 11, 2009

Course Summary

This one day entry level workshop will provide an overview of the use of Therapeutic Listening as a sensory integrative treatment modality. Over the past ten years, the use of Therapeutic Listening has grown in popularity for clinical, educational, and home settings due to its ease of use and treatment effectiveness. Recent research* has validated clinicians' reports of improvement in sensory processing, especially sensory modulation dysfunction.

This workshop will provide the training necessary to design listening protocols for individuals with difficulties in sensory modulation, self regulation, and social engagement.

Assessment strategies, specific protocols, and guidelines to meet individual needs will be taught through lecture, discussion and video case presentation. After participating in this course, you will be able to integrate these entry level protocols** into treatment across home, school, and clinic environments. Specialized headphones and CDs are necessary and are available for purchase upon completing the course. This course provides 6 contact hours or 0.6 AOTA CEUs.

*Hall, L. & Case-Smith, J. (2007). The effect of sound-based intervention on children with sensory processing disorders and visual-motor delays. *American Journal of Occupational Therapy*, 61(2), 209-215.
**Use of engagement and sensory modulation CDs.

Instructor

Sheila M. Frick, OTR, is an internationally esteemed clinician, lecturer, and pioneer in Occupational Therapy. She has over 20 years of clinical experience, having worked in psychiatry, rehabilitation, and home health before specializing in pediatrics. Her expertise includes sensory processing dysfunction, sensory integration, and auditory interventions. She created and continues to expand Therapeutic Listening, which she has taught to over 5,000 therapists worldwide. She also lectures on such topics as clinical neurology, respiration, the vestibular/auditory system, and various auditory interventions. She is the creator and author of *Listening With the Whole Body*, and co-author of *Core Concepts in Action*, *Astronaut Training*, and *Out of the Mouths of Babes*.

Course Objectives

Upon completion, participants will be able to:

- Describe the relationship between listening and sensory processing.
- Identify individuals with sensory processing and listening difficulties who may respond well to Therapeutic Listening.
- Create entry-level Therapeutic Listening programs that are adapted to meet specific needs of individual clients.
- Integrate Therapeutic Listening with sensory diets.

Schedule

- 8:15 Check-in begins
- 8:30 Overview of Therapeutic Listening, related research
- 9:30 Relationship of listening to sensory modulation dysfunction
- 10:30 Break
- 10:45 Assessment
- 12:00 Lunch (on your own)
- 1:00 Treatment protocols
- 2:15 Break
- 2:30 Case studies, video example, questions
- 4:30 End

Introduction to Therapeutic Listening®
